

SOLUTION

Analytics4NAV

VISUALISE THE PERFORMANCE OF YOUR ORGANISATION WITH ANALYTICS4NAV

If you want to continue being a successful organisation, then that requires efficient processes, flexibility and innovative power. But how can you maintain these qualities in a structural way? That starts with reliable reporting and analysis. Especially on your Microsoft Dynamics NAV data.

Unfortunately, creating and customising reports in MS Dynamics NAV is a time-consuming activity. This while the true strength of BI lies in providing rapid insight into your processes and KPIs. Would it not be great if there were a solution that could give you the right information at the right time, so you could always be sure of making the right decisions? This solution exists: Analytics4NAV from Ensior.

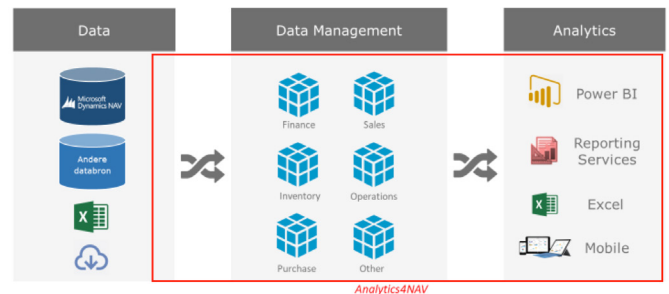

THE STORY BEHIND YOUR DATA

Analytics4NAV is a ready-to-use BI environment that integrates seamlessly with MS Dynamics NAV and is based on Microsoft BI technology, including Power BI. This environment gives you instant insight into all processes within your organisation, such as the performance of your sales team, progress in your production department or the turnover rate of your creditors/debtors. You bring data to life, as it were, swiftly exposing any new patterns, distortions and opportunities.

HOW IT WORKS

Analytics4NAV combines information from different administrations from MS Dynamics NAV, without time-consuming data extractions and error-prone processing. Every information area within your organisation has its own 'cube', where data is structured in a well-organized way, in easy to understand business terms. This means the compiling of analyses, monthly reports and dashboards can be done in just a few clicks. When you want to know more about a specific trend or KPI within an analysis you simply zoom in on the details. Analytics4NAV means there are no more hidden processes. You are firmly in the driving seat and can change course as the situation dictates and before it is too late.

ABOUT ENSIOR Ensior is the leading expert in Business Intelligence (BI), having built up a highly impressive track record since it started in 2002. Ensior, which is derived from the word 'ensure', lets organisations get a grip on their processes and get the information they need on time.
